PROFESSIONAL SUMMARY

AI/ML student with advanced Python expertise in data analysis and machine learning. Skilled in HTML & CSS at an intermediate level, creating clean and responsive web designs. Strong problem-solver with a passion for building intelligent, practical solutions and continuously expanding knowledge in AI/ML.

WORK EXPERIENCE

Skill Craft Technology — Remote
ML Intern — June 2025 – July 2025

- Built a Linear Regression model to predict house prices using features like square footage, bathrooms, and bedrooms.
- Applied K-Means clustering to segment retail store customers based on their purchasing patterns.
- Implemented an SVM classifier to distinguish between images of cats and dogs.
- Developed a Hand Gesture Recognition model to classify gestures from images/videos for intuitive human-computer interaction.

SKILLS

- Advanced Python	- Strategic Planning	- Graphic Designing	- SQL & Database
- HTML	- DSA	- Meticulous	- CSS
- Prediction Modelling	- Leadership	- Java Basic	- C++ Programming

PROJECT

Self-Care Synergy — Jan 2025

- Created a self-care management platform offering daily schedules, health insights, and caregiver assistance.
- Designed features to analyze user habits and provide personalized self-care recommendations.
- Built a user-friendly web interface with SQL-backed authentication for secure access and data management.

House Price Prediction Model — May 2025

- Built a GUI-based House Price Prediction tool using Python, Tkinter, and Linear Regression.
- Implemented real-time predictions with automated data storage and updates in CSV.
- Integrated data visualization with Matplotlib to analyze housing price trends.

VisionDX – Retinal Disease Detection System — Aug 2025

- Developed a deep learning–based system using **CNNs and TensorFlow** to detect and classify multiple retinal diseases from fundus images.
- Built an end-to-end pipeline including **image preprocessing, model training, and performance evaluation** to ensure accurate predictions.
- Designed the system for **scalability and real-world healthcare use**, enabling faster and more reliable automated diagnosis.

PROFESSIONAL CERTIFICATIONS

Machine Learning A-Z	Jul 2025
Python Pro	May 2025
AI & ML Bootcamp	May 2025

EDUCATION

B. Tech, SRMIST	2023 - 2027
XII (Science), Airforce School Ghaziabad	2022 - 2023
X, Airforce School Ghaziabad	2020 - 2021

AWARDS & ACTIVITIES

- Awarded **NCC "A" Certificate**, showcasing commitment to physical fitness, discipline, and community service in March 2021.
- Head Boy – Led the student council, coordinated events, mediated between students and faculty, and represented the school in interschool functions for session 2022-23.
