B.Tech, Computer Science and Engineering - Artificial Intelligence and Machine Learning
Address : E-901 Ajnara Integrity Rajnagar Extension Ghaziabad

Summary

Computer Science Engineering undergraduate (B.Tech, 2027) with a strong foundation in Data Structures & Algorithms, machine learning, and software development. Passionate about teaching and mentoring peers, with experience explaining technical concepts and problem-solving approaches. Proven leadership through a campus technical club, with experience organizing DSA workshops, coding bootcamps, and mentoring sessions. Combines deep problem-solving skills with the ability to communicate reasoning clearly, driven by the belief that the best engineers are also exceptional teachers.

Education

SRM IST-Ghaziabad	2027
B.Tech · Computer Science and Engineering - Artificial Intelligence and Machine Learning · Ghaziabad	CGPA - 8.5/10
Airforce School	2023
Class XII - CBSE · PCM · Hindon Ghaziabad	Percentage - 75.6%
Airforce School	2021
Class X - CBSE · All Subjects · Hindon Ghaziabad	Percentage - 91.1%

Skills

Programming Languages: Python, C++, Java, Javascript, SQL
Languages and Frameworks: HTML, CSS, Next.js, React.js, Node.js, Express.js, TensorFlow, TensorFlow Lite, Pandas, Numpy
Tools and Technologies: Firebase Authentication, Firebase Databases, Razorpay, Git, Github, PostgreSQL
Technical Skills: Machine Learning, Data Structures & Algorithms, DBMS, OOP, REST APIs
Areas of Interest: Artificial Intelligence, Full Stack Development
Domain Knowledge: Edge AI

Projects

Self-Care Synergy Self-Care Synergy	Jan 2025 - Apr 2025
Personal Project · HTML,CSS,Javascript,SQL,Node.js	Database Management System
- Developed a self-care management platform that provides daily scheduling, health insights, and caregiver assistance. - Designed and implemented user authentication and data management functionality using SQL.Built a user-friendly web interface using HTML and CSS to improve accessibility and user experience. - Developed features to organize user information and support personalized recommendations based on user inputs. - Focused on creating a structured and scalable solution for managing self-care activities and related data.	
VisionDX – Retinal Disease Detection System	Aug 2025 - Present
Personal Project · Python,Machine Learning algorithms	Machine Learning
- Developed a deep learning-based system using CNNs and TensorFlow to detect and classify multiple retinal diseases from fundus images. - Built an end-to-end workflow including image preprocessing, model training, and prediction generation for disease classification. - Worked with image datasets to improve model performance and ensure accurate disease detection. - Evaluated model performance using classification metrics to assess prediction effectiveness and reliability. - Designed the system to support automated diagnosis by providing faster and more consistent disease identification	

EdgeVisionNet: Live Energy Intelligence Edge AI Platform Personal Project · Python, TensorFlow, TensorFlow Lite, MobileNetV2, React.js, Node.js, Express.js, HTML, CSS, JavaScript	Jan 2026 – Present Artificial Intelligence / Edge AI
- Developed a full-stack Edge AI platform for deploying lightweight deep learning models on resource-constrained devices such as Raspberry Pi and IoT systems. - Built an image classification model using MobileNetV2 and optimized it with TensorFlow Lite to reduce model size and improve inference efficiency. - Developed a React dashboard with Node.js and Express.js backend to visualize CPU usage, memory consumption, inference latency, and energy utilization. - Compared multiple lightweight AI models based on accuracy, latency, and computational efficiency to identify the most suitable model for edge deployment.	

VOID - Full-Stack E-Commerce Platform Void-Tees Personal Project · Next.js, Node.js, Express.js, MongoDB, Firebase Authentication, Razorpay, HTML, CSS, JavaScript	May 2026 – Present Full Stack Web Development
- Developed a full-stack e-commerce platform using Next.js with secure user authentication, product browsing, shopping cart, and order management. - Built RESTful backend APIs using Node.js and Express.js for product, user, and order management. - Integrated Firebase Authentication for secure user login and Razorpay for seamless online payment processing. - Designed a responsive and optimized user interface with efficient database integration to deliver a smooth online shopping experience. - Deployed the application on Vercel, ensuring responsive performance and scalable deployment.	

Certifications

100 Days of Code™: The Complete Python Pro Bootcamp Certificate Udemy · UC-c037bd67-3d0b-4afc-8236-018581869de0	May 2025
Machine Learning A-Z:AI Python and R+ Chatgpt prize Certificate Udemy · UC-c9ba83c2-b797-41d1-a282-824d9b433f6c	Jul 2025
Natural Language Processing Certificate NPTEL	Apr 2026
Data mining Techniques using SAS Enterprises Miner Certificate Infosys Springboard	May 2026
Data Mining with Python Certificate Infosys Springboard	May 2026
The Ultimate Beginner's Guide to AI and Machine Learning Certificate Udemy	May 2025

Extra Curricular Activities

CSI-SRM NCR Chapter – Co-Executive LinkedIn	Aug 2024
College Event Management Lead	Aug 2024
Head Boy – Air Force School Ghaziabad	Apr 2022 – Apr 2023
